Powered by:

Udhyog POS

An easy-to-use point of sales application which contains the BackOffice (Purchase), Stock Management and the POS(sales) modules, providing Retail SMEs with an integrated, cost-effective and easy-to-manage platform.

Udhyog POS 1.2 is an application that can do some incredible things for your retail business and can help you to improve your business. It tracks inventory, creates accurate pricing and generates reports in seconds. The POS system will give you a new level of control over your operations, increasing efficiency, boosting profits and helping you fine-tune your business model and growth.

POS system saves money, provides productivity gains, increases efficiency and accuracy in database and can cut down the amount of time you spend away from the primary focus of your business. Less time with more productivity.

Feature List:

- ◆ **Customized printed bills:** Bills can be customized by adding the desired templates and including company logo.
- ◆ **Simple and robust security:** Role based access for users.
- ◆ **User friendly interface:** Monitors the inventory in transit and gives alarms when it reaches the minimum level; also enables the user to keep notes as reminders.
- ◆ **Accessibility:** Can work in a setup with various branches linked to the central database and can also manage more than one company or departments of the same business line.
- ◆ **Utility:** Produces purchase & sales; Invoicing; keeping the transaction on hold and completing it on a future date, gives customer's sales history in a presentable manner and follows inventory.
- ◆ **Reporting module:** Reports can be generated on the desktop and also on the mobile.
- ◆ **Provision for accounting :** VAT and other taxes can be added; data can be **exported to TALLY** for accounting purpose

Udhyog Mobile Reporter

An easy to use, efficient and convenient Point Of Sales Report Generation application providing various reports likes End of day Reports, Hourly Report, Customer Report, etc.

Monitoring business from time to time is a bit difficult task due to various reasons. Udhyog Mobile Reporter makes your life easy by allowing you to monitor POS in real time situation. You can connect locally using wi-fi from your Android device. You can also connect to your cloud database and monitor POS from anywhere around the world.

Udhyog Mobile Reporter can help you save time, money and efforts if you have multiple branches/units. Monitor multiple places/cashier counters from just one place with Mobile Reporter.

Feature List:

- ◆ **Convenience:** Only the administrator has the access to the mobile reporter and can keep an eye on all the branches of the company.
- ◆ **On the move business updates:** Hourly, daily and weekly reports can be produced on the mobile in the form of pie charts and line graphs of various genres of the business.
- ◆ **Customer history:** Customer details in terms of address, monthly sales etc. can be tracked down.

Main Modules of UDHYOG 1.2:

- 1) **Back Office:** Maintains supplier details, Purchases details and gives alerts about Economic order quantity and keeps a track on Inventory in transit.
- 2) **Front Office:** Point of Sale with Billing, Customer Management, Invoice Management.
- 3) **Mobile Reporter**(for Admin Only): Generate various reports runtime on Android mobile phone. The same can be accessed from any corner of the world in real time.
- 4) **Desktop Reporter**(for Admin Only): Generate various reports runtime on Server system, giving the admin access to the entire store over just one click.
- 5) **Tally Integrator:** Exports the financials to Tally, making it simple in preparing final accounts.

Benefits of Udhyog System:

- ◆ **Faster billing counters:** Leads to happy customers and more customers increasing the profitability.
- ◆ **Generates reports:** Showcases reports on the computer as well as mobile in the form of bar graphs and pie charts which can be easily summarized.
- ◆ **Boosts manpower efficiency:** Reduces erroneous entries and brings accuracy along with more focus on productivity
- ◆ **Effective Customer Handling:** Keeps a track of Customer details and previous sales.
