Digitisation is the best thing that happened to mankind, and tablets are its phenomenal wonder. In today's world the customers are technology savvy and expect quick and fast service. Taking these points into consideration Umang Software Technologies have come up with Visual Menu series – replacing the cardboard Menu cards into Tablet Menus.

### Premium Visual Menu

Premium Visual Menu (PVM) is an intangible wonder that is brimmed with functionalities and is perked up with Features. The Premium Visual Menu is designed to simplify the customer's understanding of the offered menu and to bid an interactive and a personalized service. It is a guide in an alien land for tourists as it offers their mother tongue swaying them with ease.

#### Features:

- **Multiple Language option.** PVM aids the foreign tourist to place the order without any confusion, as the description of the entire menu could be changed by click of a button.
- **Multiple Currency Option.** Here you can have the option to set the price on your menu card in the currency other than the legal tender running in your country.

- **Works without WIFI.** Premium Visual Menu works independently without WIFI.
- **Multiple price option on the same Menu.** The same can be used in the different sections of your same restaurant by pricing it higher than the other or could be used during seasons and festival times.

### Kitchen Order Pad

Kitchen Order Pad (KOP) is a complementary software of Premium Visual Menu. Kitchen Order Pad is an electronic kitchen order ticket (KOT). The attendant/waiter can place an order from the tablet without moving away from the table, notifying the kitchen as well as the cashier. The Device is being modelled to eliminate the human errors and unnecessary movements of the same. Installation of Kitchen Order Pad would boost up the business along with the efficiency of the staff.

#### Features:

- **Quick Order** is placed by selecting the item and quantity
- KOT is printed at the Kitchen Printer
- KOTs can be sent to different **kitchen sections** (different printers)
- Search is used for Faster selection of items
- Every **KOT notification** can also be sent to the cashier system
- WIFI Connectivity for **Data Synchronization**

HOTELIER, WHAT ARE YOU WAITING FOR? IT'S TIME TO CHANGE!!

## 5 REASONS WHY YOU SHOULD SAY YES TO VISUAL MENU SERIES.

- 1) **Real-time menu updation:** The Visual menu can be changed on the fly - The restaurant can remove and add dishes according to the inventory and seasonal availability.
- 2) **Promotions of Daily Specials:** Visual Menu enables the Hotelier to decide on weekly and daily specials, creating a buzz. The same can be promoted by giving a stunning description in the specials category.
- 3) **Impulsive buying:** Visual Menu increases the chances of impulsive buying. These Extra buying, bring extra sales to the restaurant and increase the average check. It is well known that “one picture is worth more than a thousand words”. It is easier to scan the pictures than reading the dishes discretions.
- 4) **Be the talk of the town:** Be the one to attract interest of your customers and the local press. Customer always wants a change and once exposed to such novelty, the word spreads. Visual Menu will boost up the brand image of the hotel with such customer attraction.
- 5) **Increased Revenues:** You will have never seen your restaurants so full! As if the Visual Menu wasn't a differentiator enough, the KOP adds cherry on the cake. KOP eliminate the erroneous entries taken by the stewards and boost up the service and over all efficiency by 25%.
